

## Post-Test Questionnaire

Please answer the following questions by placing a tick in any one of the options that apply to you. Any one number between 1 and 5 may be selected, where 1 denotes not agreeing with the statement, while 5 denotes complete agreement. Any additional relevant thoughts are highly encouraged and may be written in the 'Comments' section at the end. This test allows us to glean a quantitative representation of usability from the independent users directly.

Note that for each category, the questions that you are supposed to answer are as follows:

1. Effectiveness  
-Is the software effective at setting a timer for certain applications?
2. Redundancy  
-Does the user feel that the software houses any useless or pointless features?
3. Utility/Motivating  
-How compelled does the user feel to be productive/or stop wasting their time on unproductive applications after seeing the popup notification?
4. Learnability  
-Upon reading the User Manual, and experimenting with the software, is the user confused about the workings of the software?
5. Memorability  
-Does the user consider themselves to be comfortable and confident navigating and using the application without the assistance of the provided User Manual?

	1 - Strongly Disagree	2 - Disagree	3 - Neutral	4 - Agree	5 - Strongly Agree
Effectiveness				✓	
Redundancy			✓		
Utility/Motivating				✓	
Learnability				✓	
Memorability			✓
